REASONS FOR ALLOWANCE

The instant invention is deemed to be directed to an unobvious improvement over the invention patented in U. S. Patent No. 6,065,388 to Tsubouchi et al. The improvement comprises a brake booster with a second shaft connected to the disc member for communicating the reaction force to balance the second input force supplied by the electro-magnetic member such that a resulting output force is matched with a desired brake application for the purposes of providing first and second braking applications that have similar output forces.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

PRIOR ART

The patent to Tsubouchi et al. is cited for the showing of a brake booster similar to applicant's but lacking a second shaft.
